Derived from: Magnesium Sulfate, Magnesium Lignin Sulfate, Ferrous Sulfate, Ferrous Lignin Sulfate, Manganese Sulfate, Manganese Lignin Sulfate, Zinc Sulfate, Zinc Lignin Sulfate.

May cause skin irritation
May cause serious eye irritation

Avoid contact with skin and eyes. Avoid breathing spray mist. Do not take internally.

FIRST AID

Flush thoroughly with a large volume of water. If irritation persists, seek medical attention.

This product WILL SEVERELY STAIN concrete, masonry, and painted surfaces. Be extremely careful not to allow spray or runoff to contact with these materials. Do not mix with other fertilizers, fungicides, or insecticides unless compatibility is known.

For questions concerning this product, please email us at info@southernag.com or consult our website at www.southernag.com.

DIRECTIONS FOR USE

Citrus Nutritional Spray provides the minor elements most needed by Citrus and Tropical Fruits.

This product will benefit the plant at any time when deficiency symptoms appear. It is most effective when applied between December and February up to the time flowering is completed.

Apply spray to thoroughly cover to the point of run-off. The below preventative rate may also be used on ornamentals.

On mature trees, the amount of spray required is approximately 1 gallon for each foot of height plus 5 gallons. (20 foot tree = 25 gal. of spray)

For prevention of deficiencies:

Use 1 tablespoonful per gallon of water.
1-2 applications per year are normally sufficient.

For correction of a known deficiency:
Use 2 tablespoonfuls per gallon of water. Make at least 2 applications at two week intervals.

NOTE: Deficiency symptoms in many plants can be an indication of improper pH. Soil pH should be checked and adjusted if necessary.
