## **KEEP OUT OF REACH** **OF CHILDREN**

## **CAUTION**

May be harmful if swallowed.  
Avoid contact with skin and eyes.  
Wash hands and face after use.

**Makes 16 gallons of spray.**

Blossom-end rot of tomatoes is a common problem encountered by the home gardener. It can be recognized by the dark grey black-sunken area on the blossom-end (bottom) of the fruit. This area may be small or cover almost half the fruit. When large, the sunken area appears flat.

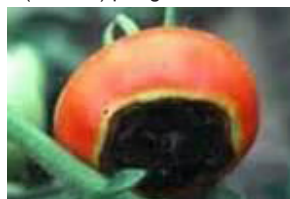

This problem is caused primarily by calcium deficiency in the fruit. In future crops, this may be reduced by proper liming of the soil. But, on a crop already in progress, the plant must be supplied with calcium very rapidly to correct the problem. This can be done with Stop Blossom-End Rot of Tomatoes.

## **DIRECTIONS FOR USE**

Apply this product as a spray using 2 tablespoonfuls (1 fluid ounce) per gallon of water.

Apply as a thorough, full coverage spray to foliage and fruit. Use at weekly intervals for at least 3 sprays. This material may be added to regular sprays for insects and disease. Always check chemical compatibility before mixing and application. Do not use greater than the recommended rate or injury to the plant may result.

Use 2 tablespoonfuls  
(1 fl. oz.) per gallon of water.

**Net Contents Liquid:**  
**1 Pint (0.474 liters)**  
**Net Wt.: 1 lb 4.5 oz (0.581 kg)**

## **FIRST AID**

**IF IN EYES:** Flush eyes for 15 minutes with plenty of water, lifting upper and lower lids occasionally while flushing. If irritation persists, see a physician.

**IF SWALLOWED:** Give 2 - 4 glasses of water, and induce vomiting by touching finger to back of throat. Never give anything by mouth to an unconscious person.

**IF ON SKIN:** Wash exposed skin thoroughly with soap and water. If irritation develops, see a physician.

**IF INHALED:** Move subject to fresh air.
